

A BLOCKED DRAIN is the last thing you need - especially when you're busy

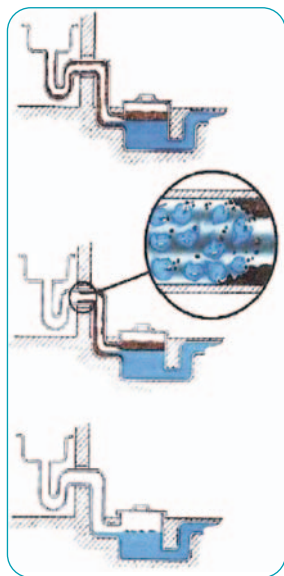

Successful caterers are now aware of the cost and environmental damage caused by blocked drains. Hot and cold fat in sinks and drains can quickly solidify, causing expensive blockages and flooding, especially in the cold weather. The nuisance and related downtime alone can result in huge losses, not to mention possible fines and even prosecution by the authorities.

Chemex has the solution for you

Bio GD is a blend of microbes that release a continuous and renewable supply of highly active enzymes into the water flow that help digest and degrade fats and grease.

Bio GD is dosed into the drainage system by a fully automatic pump so application is **effortless, efficient** and **effective**.

How can Bio GD help YOUR business?

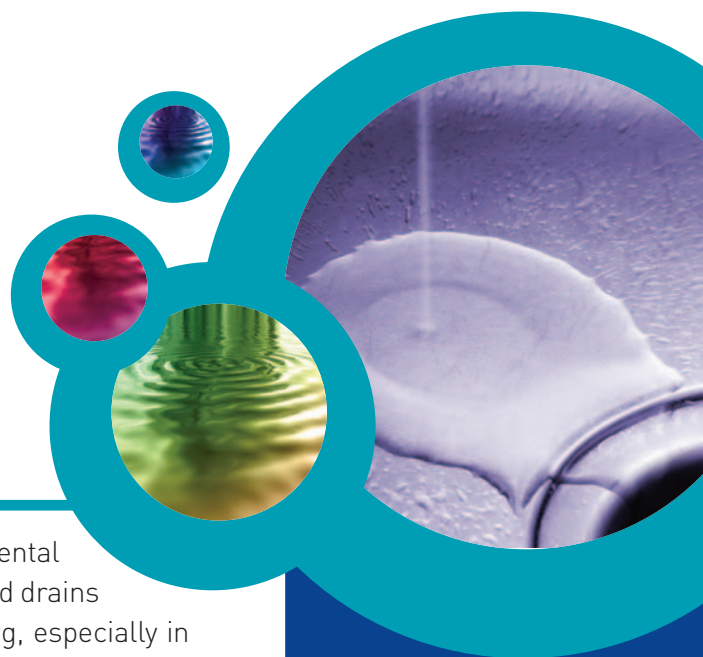

- **Eliminate blockages and odours**
- **Reduce the need for hazardous chemicals**
- **Reduce the need to unblock grease by rodding**
- **Provide an improved working environment for you and your staff**
- **Works while you're sleeping which leaves you to concentrate on running your business**

Chemex can set the dosing system to release Bio-GD every night after you close.

Your business deserves the best so why not
